Electronics Technician David Ritchley uses a recently acquired ultra-precision standardizing test console as he calibrates a potentiometric voltmeter. Ritchley is assigned to Cape Canaveral Test Equipment Repair and Calibration.

To prevent any interruption in downrange station operation when equipment is sent to TESL to be worked on, the Test Equipment Pool keeps on hand some 1,000 pieces of replacement items. Clarence Danyew, Test Equipment Procurement and Requirements Specialist, checks issue cards, while Equipment Control Clerks T. Richard Koepfli and George Ferguson take down equipment to be sent to one of the downrange islands.

Test Equipment Specialist  
Waldo Boyce

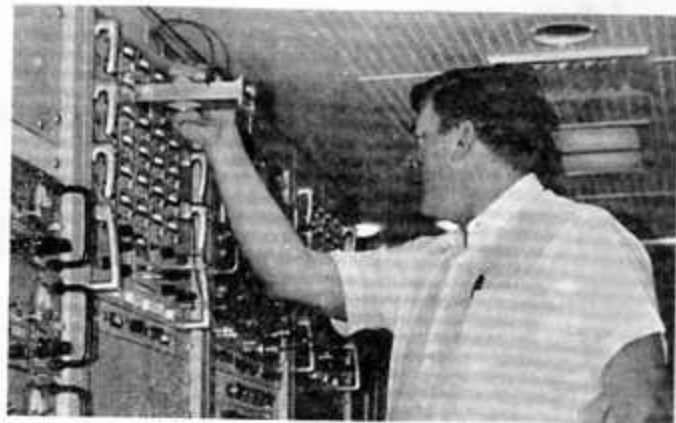

G. D. Clark, RCA-MTP Manager (right with shovel), and R. S. Mitchell, FAA-GMRD Vice President, break ground at the new FAA-RCA Building site in Cocoa Beach.

BELOW: Accepting a \$1,000 check from Gert Berry of RCA Combined Charities is RCA engineer Douglas Price, a member of the Board of Directors of the South Brevard YMCA.

Communications Center Operator Ben Hartley is one of the busiest men in the MERCURY Control Center while a man is in space.

Range Station Electronics Technician Stuart Morse works on the telemetry decommutation system at Pretoria.

George Boileau (center) MTP Technician in Cape Telemetry and President of the North Eau Gallie Civic Association, hands one of the boxes of clothing collected by Association members for New Orleans victims of Hurricane Betsy to Joe Mealey, Patrick AFB Firefighter.

Assisting is Bill Clark, Instrumentation Support Engineering Administrator and Eau Gallie City Councilman. George spearheaded drive among his Association to help the disaster victims. Donations were transported to New Orleans by the Air Force.

CW Systems Manager K. J. Martin opens gate near Mistram's 100 K West. Note sand road.

## THE TRAVELS OF MIPIR MOUSE

Certainly one of the most widely-traveled individuals associated with the FPQ-6/TPQ-18 Mipir (Missile Precision Instrumentation Radar) radars on the Air Force Eastern Test Range is a gruesome little fellow known as "Mipir Mouse."

Mipir Mouse (right) began his existence on the Range as the mascot of the FPQ-6 radar on Antigua. However, he soon vanished, only to reappear strangely at the Grand Turk TPQ-18. Soon thereafter, MM again disappeared, showing up a few days later at the Merritt Island TPQ-18. Yet, once again the elusive figure vanished, next reappearing at the Patrick FPQ-6, where he presently resides.
